PROJECTS

Global Connectivity Platform (GCP) / Mobile Virtual Network Operator (MVNO)

- **Duration**: 1 year
- **Technologies**: Java, J2EE, HTML5, Bootstrap CSS, AngularJS, Node JS, Bower, Gulp
- **Code Version Controller**: SVN
- **Description**: GCP/MVNx portal provides a set of APIs to MVNOs allowing them access to provision and provide customer care to their customers. In addition it also provides administrative interface for MVNO User Access Controls.

Robotic Process Automation

- **Duration:** 7 months
- **Technology:** Blue Prism, VB.Net
- **Description:** Automation of various DXC Finance team operations such as Journal Posting, CM creations Invoice Processing etc.

Light Connect

- **Duration**: 1+ year
- **Technologies**: Apache Tomcat 7.0, REST, Java, J2EE, AngularJS, PgSQL, Spring.
- **Code Version Controller**: SVN
- **Description**: Light connect is the solution to one of the overgrowing problem of underutilization of servers in the data centers. Light connect helps in maximizing the utilization and resolving this pain point. It has a very intuitive frontend which helps the end user to understand and use it effectively.

ACADEMIC

Graduated B.E in Computer Science and Engineering, with 76.76% from St. Joseph Engineering College Mangalore (affiliated to VTU) in 2015.
